

The tempo of success

The workhorse Ariane 5 has flown five times so far in 2007, successfully launching 10 satellite payloads

LEADERSHIP

Our Service & Solutions offer has generated a record order backlog, providing a steady workload for Arianespace's launch vehicle family during the next three years. Since the beginning of 2007, we have signed 12 new payloads for missions to GTO, along with four orders for launches into low Earth orbit.
