

The tempo of success

Intelsat-11 is an Orbital Sciences STAR-series platform, and will carry a payload of 34 transponders

TELSTAR

Intelsat's new launch contract with Arianespace enables Intelsat-11 to be orbited in the third quarter of 2007 on an Ariane 5. This quick response meets Intelsat's objectives of rapidly expanding its direct-to-home broadcast and data networking solutions for Latin America.
