**7 launches, 13 payloads, more than 42 tons**  
Ariane 5 and Soyuz have once again proven they are the world's leading launch vehicle family. Seven highly accurate missions performed by Ariane 5 and Soyuz in 2006 orbited 12 telecommunications, meteorological and astronomical satellites, plus one auxiliary passenger – placing more than 42,000 kg. into orbit. In 2007, Arianespace will continue providing the highest quality service and innovative solutions for our customers. Let our unmatched launch tempo work for you.
