

The tempo of success

Ariane 5's cryogenic main stage arrives at the Spaceport, where it will be prepared for the first flight of 2009

CONTINUITY

Preparations are starting for another busy year of Arianespace launch activity, with the initial Ariane 5 of 2009 now delivered to the Spaceport in French Guiana. This heavy-lift vehicle will be used in the first of up to eight Ariane 5 flights planned during the upcoming 12-month period, continuing our sustained mission rate for the workhorse launcher.
