

The tempo of success

Ariane 5 takes shape at the Spaceport in French Guiana for Arianespace's sixth mission of 2008

FLEXIBILITY

Arianespace's flexibility in responding to satellite availability for our proven dual-satellite missions is being demonstrated once again – with the upcoming Ariane 5 launch now scheduled to orbit Eutelsat's HOT BIRD™ 9 and W2M satellites. This will be the sixth flight of our heavy-lift workhorse launcher in 2008.
