Koreasat 6 will be the second satellite launched by Arianespace for the Korean Telecom Corporation

TRUST

Arianespace's Service & Solutions launch offer has once again been selected by Korean Telecom Corporation, this time to orbit its Koreasat 6 communications satellite. The spacecraft will be lofted by an Ariane 5 or Soyuz in 2010 from Europe's Spaceport, and follows Arianespace's successful mission with Koreasat 3 in 1999.
