

The tempo of success

Pre-launch checkout of ProtoStar I is underway in the Spaceport's S5 satellite preparation facility

UNMATCHED

ProtoStar I is on the fast track for launch, thanks to Arianespace's accelerating Ariane 5 mission rate. This Space Systems/Loral-built satellite has just arrived at the Spaceport, and it will be orbited on Ariane 5's fourth dual-payload flight of 2008.
