

# The tempo of success

RADARSAT-2 weighed 2,200-kg. for its Soyuz launch to Sun-synchronous orbit

## UNRIVALED

The on-target missions performed by our Starsem affiliate in 2007 lofted nine satellite payloads, underscoring Soyuz' growing importance in the commercial launch services marketplace. Starsem's December 14 flight placed the Canadian RADARSAT-2 satellite in Sun-synchronous orbit, bringing total Soyuz launches to 1,728.
