Tempo of Success

The Ariane 5 payload fairing is installed for Arianespace's upcoming launch with Amazonas 2 and COMSATBw-1

CAPACITY

Arianespace's fifth mission in 2009 will launch Germany's COMSATBw-1 military relay satellite and the Amazonas 2 commercial telecommunications spacecraft for HISPASAT of Spain – underscoring Ariane 5's unique dual-passenger capability. Ariane 5 flights performed so far this year have placed seven satellites with a total payload mass of more than 26,000 kilograms into highly accurate orbits.
