The New Dawn satellite will weigh approximately 3,000 kg. at launch

CONTINUITY

The 50th Intelsat satellite to be orbited by Arianespace's launch vehicle family is the New Dawn spacecraft, scheduled for a late 2010 liftoff aboard Ariane 5 or Soyuz from the Spaceport. New Dawn will provide critical communications infrastructure to Africa – supporting wireless backhaul, broadband, direct-to-home and video applications.
