

After being loaded in St. Petersburg, the two Soyuz launchers are headed from Russia to French Guiana aboard the MN Colibri roll-on/roll-off transport ship

**SHIPSHAPE** The first two Soyuz vehicles to be launched from the Guiana Space Center are now en route to Europe's Spaceport aboard the MN Colibri. Arianespace will inaugurate service with the legendary Soyuz in 2010, bringing the world's longest-operating launcher to the most modern launch site in service today.
