The ST-2 spacecraft will be launched by an Ariane 5 ECA during the second quarter of 2011

TRUST

New payloads added to Arianespace's order book in 2009 include three from our Asia-Pacific customers: JCSAT-13 for Japan's SKY Perfect JSAT Corporation, ST-2 for the Singapore-Taiwan joint venture ST-2 Satellite Ventures Pte Ltd, and ABS-2 for Hong Kong-based Asia Broadcast Satellite (ABS). These and the eight other Service & Solutions contracts announced so far this year underscore Arianespace's status as the company that telecommunications operators worldwide prefer for their launch services.
