30 Years of Success

The medium-lift Soyuz and lightweight Vega will operate with Ariane 5 at Europe's ultra-secure Spaceport

# SECURE

Arianespace's launch complex is located within NATO territory and has the highest level of protection to safeguard national security payloads. To date, 34 military observation, communications and intelligence satellites have been orbited from the Spaceport aboard Ariane vehicles, which will be joined by the Vega launcher and the legendary Soyuz vehicle.
