

30 Years of Success

The Ariane 5 mission with NILESAT 201 and RASCOM-QAF1R was performed August 4 from the Spaceport

LEADERSHIP

Our latest Ariane 5 mission successfully orbited the NILESAT 201 and RASCOM-QAF1R telecom spacecraft for Africa and the Middle East. With this latest dual-payload flight, Arianespace has lofted an industry-leading six commercial satellites in 2010 – more than all of the other launch service providers combined.
