

## 30 Years of Success

Photo: Thales Alenia Space

Athena-Fidus will weigh approximately 3,000 kg. at launch and is based on the Spacebus 4000B2 platform

# ON DUTY

The Athena-Fidus satellite will be orbited in 2013 aboard an Ariane 5 or Soyuz, underscoring the strategic nature of Arianespace's launch services. This spacecraft will provide communications for the armed forces and civil security agencies of France and Italy.
