Hughes Network Systems became a new repeat customer in 2010, selecting Arianespace to orbit its powerful Jupiter™ Ka-Band broadband satellite

VALUED

Our nine new contracts announced from January through August 2010 underscore how the satellite industry places its value in Arianespace's service & solutions offer. The order book now stands at 32 satellites for GTO delivery, along with six Ariane 5 missions for the Automated Transfer Vehicle – covering a total of 22 Ariane 5 launches, as well as 17 Soyuz flights.
